INVESTOR BROKER PLAYBOOK

Turn Your Brokerage Into the Investor Hub of Your Market

In partnership with National Hard money Lenders and Title companies

USale is the Co-creator of iBuyer Connect with Cloud CMA

1. What Is USale?

USale in One Sentence

USale is a 100% free, invitation-only marketplace where investor-friendly agents and buyers connect to source, post, and transact off-market deals — with absolutely no fees, no commissions, and no friction of any kind.

USale Makes $0. That Is the Strategy.

There is no catch. USale is the top of the funnel — the community engine that connects buyers, agents, brokers, and investors. It grows through trust. FlipiQ earns through the operator technology layer, not from transactions. A marketplace that grows through trust cannot be commoditized.

What USale Does for Brokers

Connects investor-friendly agents with active buyers and off-market deal flow. Gives brokers a tool no competing brokerage can offer. Keeps agents active and earning — which means they stay.

2. Why Brokers Should Care

FlipiQ already knows you. We have proprietary data showing which brokerages have the highest concentration of investor-active agents. We know which brokers are flipping. We know which agents are wholesaling. When we walk in, we walk in with intelligence — and an offer that makes you more money without changing anything about how you run your business.

Value Hook	What It Means for Your Brokerage
Off-Market Deal Flow	Agents post deals the moment a seller says no to listing — investors compete, agents earn the sourcing commission
Recruiting Differentiator	No competing broker can offer USale access — invitation-only means you're the door
Agent Retention	Agents generating pipeline through your brokerage don't leave — the deal flow is too valuable
Your Flip Machine	First right of refusal on every deal your agents post — before it reaches any other buyer
Override Income	Earn a percentage on every deal your agents close through USale investor operators — for a full year

3. The Pitch — Three Doors

This is not a cold pitch. The title company you work with may have opened the door. You walk in knowing their agents' deal activity. The conversation starts from intelligence.

Door 1 — Open With the Marketplace (Always First)

YOU SAY:

I'm going to be straight with you — I have data showing that you and several of your agents are actively doing investor deals. I'm not here to disrupt that. I'm here to make it better. We built a free marketplace — invitation only — in partnership with Fidelity National Title and Kiavi. It's called USale. I'd like to invite your top investor agents to a 15-minute walkthrough. Nothing to buy, nothing to sign — ever. When a deal closes through the marketplace, the sourcing agent earns up to 2.5%. Can we set that up this week?

Door 2 — The Recruiting Conversation

YOU SAY:

Now that your agents are using USale, I want to show you how this helps you recruit. We have data on every investor-friendly agent in this market. The agents you want — the ones doing off-market deals, working with flippers — are exactly who USale attracts. You can go after those agents with a pitch no other broker can make: 'Come work here and I'll give you access to the most active investor marketplace in the city.' That is a completely different recruiting conversation.

Door 3 — Technology and Operator Opportunity

YOU SAY:

Here's the part that changes your business most. If you want to become a USale operator, deals flow to you from the entire network — not just your own agents. Every agent in your market who finds a deal that doesn't fit their current buyers can route it your way. Your team sources for you. The agents you recruit source for you. And you build a flip machine on infrastructure we've already built. Want to see the full picture?

4. Your Four Income Channels

Channel 1 — Agent Production (More GCI)

Every deal an agent closes through USale runs through your brokerage split. More productive agents stay longer and recruit organically. Zero additional overhead.

Channel 2 — Acquisition Associate Override

When an agent you bring in joins a USale investor/operator team and closes wholesale deals, FlipiQ earns 10% of the wholesale fee. You earn 10% of what FlipiQ earns — for the first full year.

Metric	Per Deal	Avg 2/mo	10 Agents × 1 Yr
Wholesale Fee	$25,000	$50,000	—
FlipiQ earns (10%)	$2,500	$5,000	—
Your override (10% of FlipiQ)	~$250	~$500/	~$60,0

Metric	Per Deal	Avg 2/mo	10 Agents x 1 Yr
		mo	00

Channel 3 — Your Own Flip Portfolio

First right of refusal on deals your agents post — before they hit any other buyer. Your personal deal acquisition engine, powered by agents already working for you.

Channel 4 — Operator Network Deal Flow

As a USale operator, deals flow to you from the entire network — not just your agents. Every agent in your market can route deals your way. You build deal flow from a network you don't manage.

5. Recruiting With USale Data

USale has a proprietary dataset with real-time access to every agent, realtor, and active investor nationwide, plus MLS and tax data for 16 states. You walk into every recruiting conversation knowing what that agent is already doing.

DATA-DRIVEN RECRUITING SCRIPT:

Before we talk about your move, I want to show you something. I know you've been doing investor deals — I can see the transaction history. I know what you're running into: sellers who won't list, investors who pass, buyers you can't find fast enough. That's exactly what USale solves. I have access to a free, invitation-only marketplace built with Fidelity National Title and Kiavi. Your deals get visibility with verified buyers. You earn sourcing commissions. You double-end deals. Inside a brokerage that has the infrastructure to support that whole business. No other broker in this market is offering you this.

The Callback That Closes

WHEN THEY CLOSE ON USALE:

Hey [Name] — I saw you just closed one on USale. That's exactly what this was built for. How's it going? [Listen.] You know, I've been keeping an eye on your activity and I think there's a real opportunity right now. I'd love to have that conversation again about [Brokerage]. When does your current agreement expire?

6. Objection Handling

Objection	Your Answer
My agents already have investor relationships.	USale scales what they already have. It gives their deals visibility to buyers they're not connected to today. It multiplies relationships, not replaces them.
What does this cost my brokerage?	Nothing. USale is completely free for every agent. No subscriptions, no transaction fees. FlipiQ monetizes the operator layer — not the marketplace.
What's the catch?	Genuinely no catch. USale makes zero dollars on transactions. The marketplace grows through the ecosystem — and the bigger it gets, the more powerful every member's network becomes.
Is this backed by real companies?	Yes. Built in partnership with Fidelity National Title nationally and Kiavi, the nation's leading private lender. Co-created on the same technology as iBuyer Connect with Cloud CMA — a proven model, now independent.

7. The 90-Day Broker Playbook

Timeline	Action & Outcome
Day 1	Attend USale walkthrough. Register your brokerage. You are credited for every agent you bring in.
Days 2–7	Identify your top 5–10 investor-active agents using USale data. Walk each one through personally.
Day 14	Add USale access to your recruiting pitch. Use the data-driven script in every investor-agent conversation.
Day 30	First agent closes on USale. You get a notification. Call: 'I saw you just closed one — the marketplace is working.'
Day 60	Override income accumulates. Second and third notifications. Proof of value for every remaining recruiting conversation.
Day 90	Acquisition Associate conversations begin. Operator conversation available. Override income compounding.

8. Getting Started

You're Being Invited to Build This With Us

We are building the first cohort of broker partners. Partners get first-mover advantage in their markets, co-branded tools before anyone else, and direct input into how the program develops.

What You Get

- Free USale marketplace access for your entire agent roster
- USale's proprietary data on investor-active agents in your territory
- Co-branded call guides and conversation frameworks for your recruiting team
- Custom AI assistant generating dynamic scripts based on agent profiles you're targeting
- Real-time transaction notifications for every agent you bring in
- Percentage override on every deal closed by agents you place with USale operators — first full year
- USale webinars run by FlipiQ — we present, you get credited for every agent who joins

The Ask Is One Webinar Invite.

You're not changing your recruiting pitch. You're adding a second door for the 80% who were never going to move anyway — a door that leads with value, builds trust, and creates a notification system that keeps you relevant to every agent you've ever called. Let's start there.
